Art Unit: 3747

I. RESTRICTION

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-4, drawn to a hydraulic control valve, classified in Class 251, subclass unknown.

II. Claims 5-20, drawn to a control system, classified in Class 123, subclass 480.

III. Claim 21, drawn to a method of controlling an actuator, classified in Class 251, subclass unknown.

Inventions of the hydraulic control valve and control system are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations.

(M.P.E.P. § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it does not require a control system. The subcombination has separate utility such as a device used with a control system.

2. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III, restriction for examination purposes as indicated

Art Unit: 3747

is proper. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
